Haskell Workshop - Assignment

This Haskell Workshop is based on the the haskell workshop from two students who prepared it for the ESD course in Informatics study programme at Fontys Venlo in 2018. Thank you very much Marco Kull and Jan Evers.

Assignment 1

- Do the assignments in /assignments folders.
- There are in total 6 tasks under assignments.

    - assignments/task_0 - contains some *playing around* and *hello world* examples
    - assignments/task_1
    - assignments/task_2
    - assignments/task_3
    - assignments/task_4
    - assignments/task_5

- **task_0** to **task_4** are **mandatory**. You *have* to do these and check your solutions into your github classroom repository - so this repository.
- **task_5** is **optional**

Deadline

- 27th May 2020 - EOD
